Be Part of the Solution!

Common Sense Precautions:

- Do not burn within 50 feet of any structure.
- Do not burn near landfills.
- Do not burn near streams or sinkholes.
- Do not burn near utility lines.
- Do not burn on windy days.

Alternatives to Open Burning:

Reduce, Reuse, and Recycle

- Donate old clothes, shoes, books, appliances, electronics, furniture and toys to charity.
- Carry a coffee mug with you instead of disposable cups.
- Bring your own cloth bag to the store.
- Many counties in Kentucky have a community recycling center that accepts some or all of these:

Newspaper Aluminum
Plastics #1 - #7 Steel
Cardboard Glass

Compost

- Leaves and grass clippings can be turned into food for your garden or houseplants.
- Tie four wood pallets together to make a simple compost bin.

Landfill

 Items that cannot be reused or recycled should be taken to a landfill or solid waste transfer station.
 Many counties have one day a month FREE of charge.

Contact your local solid waste coordinator for more information or visit **www.waste.ky.gov** for a county-by-county listing of recycling centers.

Churches, and Farms

Report Illegal Burning!

Illegal open burning is hazardous to human health and to the environment. Report suspected cases of illegal burning by calling the open burn hotline:

1-888-BURN-LAW

Learn Before You Burn!

According to KY Title 401 KAR 63:005, some open burning is legal, with restrictions. But **most materials are actually illegal to burn.** The Division for Air Quality can impose **fines of up to \$25,000** per day per violation of the law. It pays to learn before you burn!

Serious Health Risks

Today's trash is different; plastics, chemicals, and numerous other synthetic materials are far more common in the stuff we throw away. Burning this trash releases high levels of toxic pollutants such as dioxins, sulfur dioxide, lead, and mercury. Children and the elderly are especially sensitive to the air pollution from open burning.

An example of an illegal open burn.

What are dioxins?

Even the most common household trash produces **dioxins** when burned. Dioxins are dangerous at extremely low levels and have been linked to cancer and other serious health problems. The EPA has shown that open burning of garbage is the nation's largest source of non-industrial dioxin emissions.

Dioxins from open burning end up in our water and soil. They accumulate in animal tissue and enter our food supply, especially when we consume meat and dairy products.

LEGAL OPEN BURNING

(check local laws)

Agriculture

Plant Beds Tobacco Curing

Land Management (Onsite Only)

Leaves & Weeds Storm Debris (tree limbs) Natural Growth from Land Clearing Natural Land Management

Construction Site Warming Fires

Contained in 55 gallon drum (maximum) Clean lumber only Only when air temperature is below 50°

Miscellaneous

Camp Fires (cured/seasoned wood)
Ceremonial Bonfires
Cooking
Uncoated Household Paper & Cardboard Products

RESTRICTIONS

- Fire Emergencies: ALL open burning is prohibited when a fire emergency is declared.
- Fire Hazard Season: From Oct. 1 Dec. 15 and from Feb. 15 Apr. 30, burning within 150 feet of any woodland area is allowed only between 6 p.m. & 6 a.m.
- "Non-Attainment" Counties: From May-September, open burning is further restricted in the following counties: Boone, Boyd, Bullitt, Campbell, Jefferson, Kenton, Lawrence, & Oldham. These counties were previously designated "non-attainment" for ozone and/ or particulate matter because their pollution levels exceeded those permitted by the Clean Air Act.
